\*Pricing data measured over the period of October 2014 to October 2015, based on average price per night for 4\* accommodations (chosen as a standardized way of comparing different types of accommodation across varying cities, and as a way to be indicative of overall pricing trends in accommodations of all levels). 'Peak' refers to the highest priced week for the given city over the period measured. Weeks were defined as Monday to Sunday per calendar month.

GREAT DEAL!
